

Lighthouse

A lighthouse warns ships of rocks so that they are not wrecked. It is also a beacon to let sailors know they are close to land.

In the museum we have lots of beautiful Sunday School banners.

Some of them have a lighthouse on them. Why do you think a lighthouse is a symbol for Sunday School?

You can make your own lighthouse:

- Stick strips of red tape around a paper cup. Lighthouses are often painted red and white.
- You can draw a door and some windows on the upturned cup. Lighthouses are sometimes very tall with several floors.
- Place a battery tealight and then a plastic bottle bottom on the upturned cup.
- Lighthouses are symbols of God's guidance and protection.
