

# Englesea Brook: Our Historic Environment

The Story of Primitive Methodism

**Welcome to 'Our Historic Environment' online resource.**

The resource is suitable as an aid for students participating in the ASDAN Environmental Short Course (13 – 19 year olds) for Module 3, The Built Environment, and for Key stage 5 students engaged in an Extended Project Qualification (EPQ), and for home educators.

The aid considers environmental impact on historic buildings, taking recent restoration of one of our memorials as an example.

It also explores preventive conservation in a heritage setting, looking at pest monitoring, lighting and ultra-violet levels, temperature and humidity.

The aid may be of use and interest to students of environmental studies, heritage and conservation.

Included in the resource is a Power Point presentation and comprehensive workbook.

If you require further information or assistance, and if you would like to feedback how the resource worked for you, please contact the Learning Officer, Elizabeth Morris.
